PROFFESIONAL SUMMARY

Accomplished and intelligent detail-oriented and analytical credit officer with significant amount of expertise in revenue and credit sector. Possess in-depth knowledge in assessing creditworthiness, managing loan applications and ensuring compliance with regulatory guidelines and adept at applying theories, ideas in real world situations and using credit score tools and maintaining accurate financial records. Strong understanding in financial analysis, risk assessment and maintaining strong client relationship to facilitate strong lending decision making.

Also, I'm a Certified Junior Cybersecurity Analyst with a strong foundation in vulnerability management, incident response and threat management. Proficient in security tools and frameworks with hands-on experience in identifying and mitigating security risks.

Currently I'm persuing software engineering and recently completed an intensive Bitcoin Lightning Developer Bootcamp, acquiring in-depth knowledge of decentralized payment systems, smart contracts, and scalable Layer-2 solutions. Proficient in building secure and efficient payment channels, integrating Lightning Network protocols, and leveraging Blockchain for seamless transactions. Passionate about advancing financial inclusion and creating impactful decentralized applications.
